

THE NATIONAL CRISIS IN CHILDBIRTH

WE NEED HELP! Can you rise to the occasion?

We intend to have a national petition drive in every state to cause State and federal legislation to study and enact alternatives in birth in all venues (home, hospital etc..)

We would like a person who has expertise in discussing your area of birth to consider being on the Board of Advisors to "Creative Direction" Creative Directions takes no money and gives none.

We would like a person to consider being the State Coordinator for Creative Directions Petition drive in your state. This person will be the press contact as well as the petition drive coordinator.

We would like a list of resources of retired persons who have worked in the birth industry and share our concerns. These persons will be considered for seminars and interviews as well.

If you or your organization can not help please let us know who can. If you can help please send a resume of the person and of the organization to us.

There will be a forthcoming book "The Crisis in Childbirth" published shortly with the petition drive as part of the book.

There is a web site at: www.creativedirectionsbirth.com that will grow to the task and petitions are available at the site.

Start getting signatures now. Whether you become on point or not get working on the petitions.

Who am I?

My name is Chuck Dawson. I am the former Chairman and co-author of the State of California Alternative Birth Committee that made a lot of what we have legal. I worked with Suzanne Arms, and Dr. Don Creevy of Stanford U. Medicine to inform people in California about birth and sensitivity. I worked with Dr. Fredrick Leboyer in this country to sensitize birth. I have a Masters in Psychology and My partner Trish is an Attorney who participated in the birth revolution in 1975.

I am disgusted with the loss of gains in Home Birth, Clinic Birth and Natural birth all together. I intend once again to do something about it. If I make money on the book (I hope so) it will be the first money I have made in the birth industry.

Go to the web site and read the proposition, then get involved www.creativedirectionsbirth.com

Note: any email to me must have "**creative directions**" first words in the subject line otherwise spam!

Thanks
Chuck Dawson
